# Vinit Khanvilkar

Vadodara, Gujarat — +91 6353770442 — vinitkhanvilkar07@gmail.com — LinkedIn — GitHub

## Professional Summary

AI/ML Developer experienced in Python backend development, LLM integration, retrieval-augmented generation (RAG), and document intelligence. Skilled in building AI-powered applications, machine learning pipelines, conversational assistants, and automated data extraction systems using Python, Frappe, LangChain, Groq, and ChromaDB.

## Education

**B.Tech in Computer Science and Engineering** July 2022 – May 2026
*ITM (SLS) Baroda University, Vadodara* CGPA: 7.77

**Higher Secondary Certificate (HSC)** June 2021 – March 2022
*Phoenix Institute, Vadodara*

## Technical Skills

**Programming Languages:** Python, SQL, JavaScript

**Backend and Frameworks:** Frappe Framework, ERPNext, Flask, REST APIs, Git

**AI and Machine Learning:** LLM Integration, RAG, NLP, LangChain, Groq, ChromaDB, Embeddings, Scikit-learn, TensorFlow, PyTorch, Model Evaluation

**Data Processing:** Pandas, NumPy, Data Preprocessing, Feature Engineering, pdfplumber, Excel Export

**Databases and Geospatial:** MySQL, SQL Query Optimization, Mapbox GL JS, GeoJSON

## Work Experience

**AI/ML Intern** Dec 2025 – June 2026
*OctoAdvisory*

- Contributed to MARSAIX, an AI-based platform that helps entrepreneurs identify suitable industries in India through feasibility analysis.
- Developed AI-driven recommendations using vendor data, government incentives, regulatory approvals, land availability, and employment data.
- Built Frappe applications involving DocTypes, workflows, permissions, and backend scripting. Developed machine learning pipelines for data preprocessing, feature engineering, model training, and evaluation.
- Worked with NLP, RAG pipelines, LLM integrations, and Mapbox-based geospatial visualization features.

**AI/ML Developer** June 2026 – Present
*OctoAdvisory*

- **Talkdeo:** Developed Python and Frappe backend APIs for AI-powered Vastu consultations and implemented conversational chatbots using Groq and LangChain.
- Built RAG-based question-answering pipelines using ChromaDB and embeddings, and contributed to AI-powered floor plan analysis.
- **AI Invoice and Document Extraction Platform:** Built an AI-powered invoice and document extraction platform from scratch using Python and Frappe.
- Implemented LLM-based field detection and dynamic DocType generation to support new invoice formats. Developed PDF extraction using pdfplumber and rule-based methods, along with asynchronous bulk processing, data validation, and Excel export.

## Projects

**Digital Internship Approval and Monitoring System**
*Frappe Framework, ERPNext, Python, MySQL*

- Built a role-based internship management system for students, deans, coordinators, and mentors using Frappe.
- Implemented approval workflows, mentor assignments, weekly reports, custom DocTypes, role-based permissions, and automated PDF generation.

**SarkarSathi – AI-Powered Government Scheme Recommendation System**
*Python, Flask, Groq LLM (Llama 3.3), ChromaDB, Pandas, RAG*

- Built an AI-powered conversational assistant that helps citizens discover relevant government schemes through RAG-based recommendations.
- Developed a retrieval pipeline combining Pandas-based filtering with ChromaDB semantic search across more than 3,400 government schemes.
- Implemented LLM-based profile analysis, eligibility verification, and personalized scheme recommendations.
